THE Chemist, paler than before, stole upward like a thief; was to see him," said the Chemist. "Can you spare a dressed himself to the pale visitor in the black clock."

"Yes, I wish to see him," said the Chemist. "Can you spare a light?"

"What have I done!" he said conin the black cloak. "What may be your pleasure, Sir," he asked, 'with us?"

"I fear that my coming in unpercived," returned the visitor, "has alarmed you; but you were talking and did not hear me."

"The watchfulness of his haggard fusedly. "What am I going to do!"

"To be the benefactor of mantrust that darkened it, seemed to trouble Mr. Tetterby. He paused; and looking fixedly at him in real looked round, but there was nothing there; and a passage now a man stupefied or fascinated." and did not hear me."

"My little woman says—perhaps you heard her say it," returned Mr. Tetterby, "that it's not the first time you have alarmed her tonight."

"I am sorry for it. I remember to have observed her, for a few moments only, in the street. I had no intention of frightening her."

As he raised his eyes in speaking, she raised hers. It was extraordinary to see what dread she had observed it.

"My name," he said, "is Redlaw. I come from the old college hard by. A young gentleman who is a student there lodges in your house, does he not?"

and looking nxedly at him in return, stood for a minute or so, like a man stupefied, or fascinated.

At length, he said, "I'll light you, Sir, if you'll follow me."

"No," replied the Chemist, "I don't wish to be attended, or announced to him. He does not expect me. I would rather go alone. Please to give me the light, if you can spare it, and I'll find the way."

In the quickness of his expression of this desire, and in taking the revent a passage now shutting out the little parlor from his view, he went on, directing his view, he went.

"It is only since last night," he muttered gloomily, "that I have remained shut up, and yet all things are strange to me. I am strughted went.

"In the quickness of his expression of this desire, and in taking the rewal and here as in a dream. What interest have I in this place, or in any place that I can bring to my remembrance? My mind is going blind!"

OPA Head Explains Why the Government Is Giving

## FREE RED POINTS for Used Cooking Fats

"Behind this plan, effective December 13th, is one of our country's most urgent wartime needs," says Mr. Bowles. "Every patriotic American wife and mother is asked to read this statement."

XXXARS are fought Gunpowder is made from glycerine. Glycerine can only be made from fats. Behind those few

words lies one of your CHESTER BOWLES
Administrator
Office of Price Administration country's most serious needs. Fats used to be imported in huge quantities from islands of the Far East. Those islands are now in enemy hands. And the government wants the used fats you can save in your kitchen to make mountains of ammunition, medicines, and other battlefield needs.

"Not a Premium on Patriotism"

"These are the facts as they have been pointed out to OPA by the War Food Administration And they have led to this new plan: 'Two red ration points free when you turn in a pound of used fat to your butcher.'

"This is not a premium on patriotism. It is a way of bringing home to all women the urgent need of kitchen fats to make gunpowder. Moreover, it seems only just to return points for this service, because fats cost ration stamps. Your butcher has been informed of this ruling which went into effect on December 13th."

Chuter Brules

How the Plan Will Work

It's as simple as it sounds. All you have to do is fill up a tin can with used cooking fat and take it to your butcher. You don't need to use

a special kind of can-any kind will do. And you don't need to have any specified amount of fat; take it to your butcher whenever the can is full. He will estimate the weight of the tin and give you, cash in hand, 4c and two red points for every pound of used fat you deliver.

The government does not ask for these fats until you've got the cooking good out of them. But when that is done, every spoonful is wanted.

Would it surprise you to learn that just one single tables poon of fat-just the little bit that s usually washed out of your broilers and roasting pans and skillets-will make five machine gun bullets? Or enough smallpox vaccines for seventy-three men?

Answers to Housewives' Questions

10 8748

a-brio

It doesn't matter whether the fat is burned or black-it still makes crystal-clear glycerine.

It doesn't matter whether it's pan drippings, fat from a soup, used shortening, cooking oils, or melted solid fat.

And, finally, it doesn't matter how little you save each day. Every drop is precious.

Saving these fats and turning them in is not an easy job. But it's a lot easier than doing the things our men must do on the battle fronts. Is it too much for them to expect that the wives and mothers of America will perform this task for them-to help put into their hands what they need to win?

They know it is not. They know that all their country has to do is ask - once our women really understand.

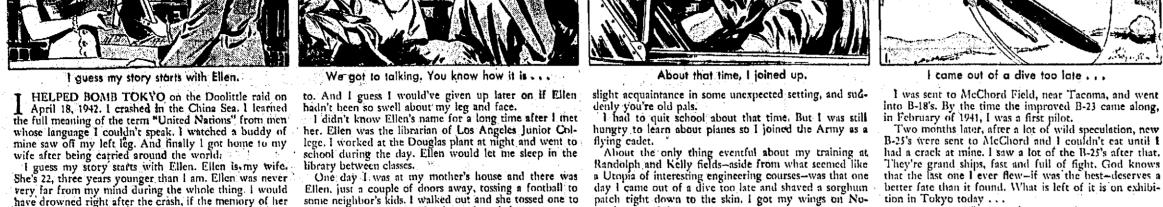

Won't you start saving your used fats today?

Approved by Office of Price Administration and War Production Board. Paid for by Industry.

CHAPTER VII little staircase," showing one com-HER husband, who had not been altogether free from the infection of her fear at first, and whom the present strangeness of her manner did not tend to reassure, addressed himself to the pale visitor in the black clock.

THE Chemist, paler than before, stole upward like a thief; was to see him," said the Chemist. "Can you spare a dressed himself to the pale visitor in the black clock."

"Yes, I wish to see him," said the Chemist. "Can you spare a light?"

"What have I done!" he said conin the black cloak. "What may be your pleasure, Sir," he asked, 'with us?"

"I fear that my coming in unpercived," returned the visitor, "has alarmed you; but you were talking and did not hear me."

"The watchfulness of his haggard fusedly. "What am I going to do!"

"To be the benefactor of mantrust that darkened it, seemed to trouble Mr. Tetterby. He paused; and looking fixedly at him in real looked round, but there was nothing there; and a passage now a man stupefied or fascinated." and did not hear me."

"My little woman says—perhaps you heard her say it," returned Mr. Tetterby, "that it's not the first time you have alarmed her tonight."

"I am sorry for it. I remember to have observed her, for a few moments only, in the street. I had no intention of frightening her."

As he raised his eyes in speaking, she raised hers. It was extraordinary to see what dread she had observed it.

"My name," he said, "is Redlaw. I come from the old college hard by. A young gentleman who is a student there lodges in your house, does he not?"

and looking nxedly at him in return, stood for a minute or so, like a man stupefied, or fascinated.

At length, he said, "I'll light you, Sir, if you'll follow me."

"No," replied the Chemist, "I don't wish to be attended, or announced to him. He does not expect me. I would rather go alone. Please to give me the light, if you can spare it, and I'll find the way."

In the quickness of his expression of this desire, and in taking the revent a passage now shutting out the little parlor from his view, he went on, directing his view, he went.

"It is only since last night," he muttered gloomily, "that I have remained shut up, and yet all things are strange to me. I am strughted went.

"In the quickness of his expression of this desire, and in taking the rewal and here as in a dream. What interest have I in this place, or in any place that I can bring to my remembrance? My mind is going blind!"

OPA Head Explains Why the Government Is Giving

## FREE RED POINTS for Used Cooking Fats

"Behind this plan, effective December 13th, is one of our country's most urgent wartime needs," says Mr. Bowles. "Every patriotic American wife and mother is asked to read this statement."

XXXARS are fought Gunpowder is made from glycerine. Glycerine can only be made from fats. Behind those few

words lies one of your CHESTER BOWLES
Administrator
Office of Price Administration country's most serious needs. Fats used to be imported in huge quantities from islands of the Far East. Those islands are now in enemy hands. And the government wants the used fats you can save in your kitchen to make mountains of ammunition, medicines, and other battlefield needs.

"Not a Premium on Patriotism"

"These are the facts as they have been pointed out to OPA by the War Food Administration And they have led to this new plan: 'Two red ration points free when you turn in a pound of used fat to your butcher.'

"This is not a premium on patriotism. It is a way of bringing home to all women the urgent need of kitchen fats to make gunpowder. Moreover, it seems only just to return points for this service, because fats cost ration stamps. Your butcher has been informed of this ruling which went into effect on December 13th."

Chuter Brules

How the Plan Will Work

It's as simple as it sounds. All you have to do is fill up a tin can with used cooking fat and take it to your butcher. You don't need to use

a special kind of can-any kind will do. And you don't need to have any specified amount of fat; take it to your butcher whenever the can is full. He will estimate the weight of the tin and give you, cash in hand, 4c and two red points for every pound of used fat you deliver.

The government does not ask for these fats until you've got the cooking good out of them. But when that is done, every spoonful is wanted.

Would it surprise you to learn that just one single tables poon of fat-just the little bit that s usually washed out of your broilers and roasting pans and skillets-will make five machine gun bullets? Or enough smallpox vaccines for seventy-three men?

Answers to Housewives' Questions

10 8748

a-brio

It doesn't matter whether the fat is burned or black-it still makes crystal-clear glycerine.

It doesn't matter whether it's pan drippings, fat from a soup, used shortening, cooking oils, or melted solid fat.

And, finally, it doesn't matter how little you save each day. Every drop is precious.

Saving these fats and turning them in is not an easy job. But it's a lot easier than doing the things our men must do on the battle fronts. Is it too much for them to expect that the wives and mothers of America will perform this task for them-to help put into their hands what they need to win?

They know it is not. They know that all their country has to do is ask - once our women really understand.

Won't you start saving your used fats today?

Approved by Office of Price Administration and War Production Board. Paid for by Industry.
